PROJECTS

PRODUCTION CONTROL RECTIFICATION SYSTEM (M.TECH)

2022-24

- Production control is about monitoring and controlling all aspects of a manufacturer's production and operation.
- Prepared a Master Production Schedule to reduce the amount of re-planning activities by 20%.

MULTICARRIER MODULATION FOR 5G NETWORKS (B.E)

2017-20

- Improved speed, generated different carriers, and reduced PAPR (Peak Power to Average Power Ratio) by implementing the UPMC technique.
- Implemented a modulation technique that can provide the data rates up to 10Gbps for 5G Applications.

FOOTSTEP POWER GENERATION USING PIEZOELECTRIC CRYSTALS

2014-17

- Generated electrical energy using around 100+ piezoelectric material which converts mechanical energy into electrical energy i.e., generating Voltage using footstep force and the generated electrical energy can be used to charge cell phones, MP3 players, and small electronic gadgets.
