SUMMARY

Cyber Forensics graduate with a strong foundation in security and networking. Skilled in threat analysis, penetration testing, log monitoring, and incident response. Experienced in identifying vulnerabilities, mitigating risks, and implementing security measures to protect organizational assets. Committed to staying updated with evolving cybersecurity trends to enhance security posture. Looking forward to joining a professional organization that offers both personal growth and professional growth to enhance myself deeper together with a good network.

SKILLS

- Strong knowledge of cyber security, including both Defensive and Offensive security practices.
- SIEM(splunk): for log monitoring, alerting, and reporting.
- Burp Suite and Nmap: for web vulnerability scanning and testing.
- EDR and XDR: for security monitoring and threat detection.
- Nessus and OpenVAS: for identifying and assessing vulnerabilities.
- SQLi-SSRF-CSRF: for testing and exploiting web application vulnerabilities.
- IDS and IPS: Familiar with intrusion detection systems (IDS), and intrusion prevention systems (IPS) for network traffic analysis.
- Investigating phishing, malware, backdoors, and other cybersecurity threats to analyze security events and identify potential threats.
- Familiar with Shodan, OSINT, and MITRE framework for information gathering.
- Familiar with OWASP Top 10 attacks and Common Vulnerabilities Exposures (CVE) for effective analysis.
- Understanding of SaaS, PaaS, and IaaS platforms.
- Basic Understanding of AWS, Azure, and GCP.
- Understanding of network security protocols, VPNs, TCP/IP networking, and OSI model.
- Understanding of firewalls, switching, and routing.
- System administration and troubleshooting.
- Proficient in using Windows, Linux, and MacOS.

WORKING EXPERIENCE

Cyber security Intern | Bsoft Bangalore

May 2024 - December 2024

Experienced in security operations monitoring, CTF challenges, and vulnerability analysis. Creating and presenting reports on exploitation methods, CVE patterns, and zero-day threats. Skilled in networking and firewall log monitoring.

EDUCATION

BSc Cyber Forensics

August 2021 - April 2024

Mahatma Gandhi University (MGU) Kerala.

PROJECTS

Bitcoin Abuser:

Developed using Python Django to examine misuses within the bitcoin payment methods and enhancing overall transaction security.

Website Blocker:

Developed Python-based software that allows users to block specific URLs and restrict access to certain websites.
