SUMMARY

I am a motivated Computer Engineer with strong technical skills in C, Java, Python, and various web technologies. I have successfully developed multiple projects focusing on user experience and efficiency, including a voice-enabled student management system and a budget planner application. I thrive in collaborative environments and am keen on solving real-world problems through technology.

EDUCATION

BE in Computer Engineering

Vidyalankar Institute of Technology

📅 2021 - 2025

STRENGTHS

Quick Learner

Adapt swiftly to new technologies and methodologies, ensuring efficient implementation and continuous professional growth.

Collaboration Skills

Excel in teamwork and cross-functional coordination to achieve project goals effectively.

Problem Solver

Skilled in analyzing complex issues and delivering innovative solutions to ensure project success.

Attentive Listener

Focused on understanding and addressing needs effectively.

CERTIFICATIONS

Learning Java Collections

Enhanced ability to manage and manipulate data efficiently using advanced collection frameworks.

Learning Java 11

Gained expertise in modern Java features for improved code quality and performance.

Java Object-Oriented Programming

Strengthened skills in designing modular and reusable software components.

Designing RESTful APIs

Acquired proficiency in creating scalable and efficient APIs for seamless client-server communication.

SKILLS

C

Java

Python

JavaScript

TypeScript

Angular

SQL

MongoDB

Spring Boot

Operating Systems

OOPS

PROJECTS

Speech-Enabled Student Information Management System

📅 2024 📍 Ulhasnagar

Simplified student information management through voice commands.

- Developed REST APIs with Flask
- Implemented speech-to-text model
- Designed frontend with Angular
- Managed MongoDB database

Budget Planner

📅 2024 📍 Ulhasnagar

Created a user-friendly Budget Planner application using Angular.

- Easily define and customize monthly or yearly budgets
- Log and categorize expenses for detailed insights
- Record and manage multiple income sources

SpeakEase

📅 2024 📍 Ulhasnagar

Simplified website navigation through voice commands.

- Developed REST APIs with Flask
- Implemented speech-to-text model
- Designed frontend with Angular
