EDUCATION

- Bachelor of Engineering in Electrical Engineering from SSBT College of Engineering, Jalgaon, Maharashtra, 2021

SKILLS

- Collaborator
- Communicator
- Innovator
- Planner
- Thinker

CORE COMPETENCIES

- User Experience Design
- Agile Development Methodologies
- Cross-Functional Team Collaboration
- Software Development Life Cycle
- Technical Documentation
- Requirement Gathering
- Stakeholder Engagement
- Performance Optimization
- Responsive Web Design

Pushkar Chandrakant Narkhede

PROFILE SUMMARY

- A competent professional offering over 3 years in front-end development, focusing on the design and implementation of responsive web applications that prioritize user engagement in the tech industry.
- Hold the position of Senior System Engineer at Infosys, concentrating on React development and dedicated to improving application performance and optimizing user experience across various platforms.
- Developed a robust skill set encompassing advanced React, state management with Redux, and RESTful API integration, contributing to a comprehensive understanding of full-stack development processes.
- Drove a 30% growth in viewership by creating engaging web applications that prioritize user interaction and satisfaction.
- Maintain comprehensive expertise in contemporary web technologies and frameworks, notably Node.js, facilitating a smooth transition into roles focused on full-stack development.
- Showcase a robust comprehension of agile methodologies and project management principles, guaranteeing the punctual delivery of superior software solutions that meet client expectations.

WORK EXPERIENCE

Infosys, Pune, Maharashtra | Since March 2022

Senior System Engineer (React Developer)

- Developing dynamic, cross-device web applications using React, driving a 30% increase in viewership and reducing bounce rates by 20%.
- Optimizing application performance and scalability by integrating Redux for state management, cutting data fetching time by 40% and enhancing user interaction efficiency by 30%.
- Integrating RESTful APIs to ensure seamless data flow between front-end and back-end systems, boosting overall application performance by 30%.
- Creating reusable React.js components and front-end libraries, streamlining the development of new features and reducing development time by 15%.
- Ensuring cross-browser compatibility and optimizing web applications, cutting load times by 25% and accommodating a 50% increase in user traffic.

PROJECTS

Chat Application | [GitHub](#) | [View](#) | React, Redux, React Hooks, React Router December 2023

- Developed a chat application with a user-friendly interface using React.
- Utilized React Hooks for efficient state management and Redux for centralized data handling.
- Implemented React Router for seamless navigation within the application.
- Enhanced user experience through responsive design, achieving a 25% increase in user retention and a 30% reduction in error rates.

IT SKILLS

- **Programming Languages:** React (advanced), HTML/CSS, JavaScript, TypeScript
- **Databases:** Oracle, MySQL
- **Developer Tools:** VS Code
- **Frameworks:** Node.js, GitHub

TRAININGS

Full Stack Web
Development, Coding Ninjas
(Feb 2023 – Feb 2024)

PERSONAL DETAILS

- Address: Pune, Maharashtra
- Date of Birth: 15 May 2000
- Languages Known: English, hindi and marathi

Weather Dashboard Application | [GitHub](#) | [View](#) | React, RestFul API November 2023

- Developed a dynamic weather dashboard using React, showcasing proficiency in building user interfaces with a component-based approach.
- Integrated third-party weather APIs to fetch real-time data, enhancing the application's functionality and user experience.
- Applied problem-solving techniques from past projects to anticipate and resolve potential issues, ensuring reliable performance and usability.

Superhero Hunter Dashboard | [GitHub](#) | [View](#) | JavaScript, HTML, CSS September 2023

- Developed a Superhero Hunter dashboard that retrieves and showcases a catalog of superheroes, including detailed descriptions, series, and comics.
- Implemented efficient data handling techniques, reducing data retrieval time by 15%.
- Enhanced user engagement by 20% with an interactive and visually appealing interface.
