raghu2301@gmail.com

Bangalore

SUMMARY

Highly motivated and detail-oriented cybersecurity professional with a strong foundation in ethical hacking, penetration testing, vulnerability analysis, and threat mitigation. Proficient in modern security tools and technologies, with a proven ability to identify and resolve security threats effectively. Excels in collaborative environments, delivering secure, high-quality solutions while ensuring platform integrity. Seeking a challenging role that fosters growth, maximizes my cybersecurity expertise, and enables me to make a significant impact. Adaptable to rotational shifts, including US hours, and committed to strengthening organizational security.

TOOLS

- Burp Suite
- Nmap
- OWASP ZAP
- Dirbuster
- Metasploit
- Wireshark
- Kali linux
- Maltego
- OSINT
- Nessus
- Suricata
- Autopsy
- LimaCharlie
- Slack
- Splunk

CERTIFICATION

TCSA
Texial Certified SOC Analyst

CEH v13
Certified Ethical Hacker Version 13

TISA
Texial Information Security Auditor

SKILLS

- Penetration testing tools : Metasploit, Burp Suite, Nmap, Nessus, OWASP ZAP, dirbuster
- Web application security testing, including SQL injection, Cross-Site Scripting (XSS)
- Cybersecurity frameworks such as OWASP Top 10
- Network monitoring
- Firewall configuration
- Compliance standards
- Application security
- Security analysis
- Security maintenance
- Intrusion Detection and Response
- Information assurance
- Erecting firewalls
- Security Information and Event Management (SIEM)
- Security Orchestration, Automation, and Response (SOAR)
- Endpoint Detection and Response (EDR)
- Team building
- Vulnerability Analysis
- Malware Analysis and Monitoring
- Quality Assurance
- Network Security
- Reporting and documentation
- Firewall Management
- Log Analysis
- Threat Detection and Prevention
- Threat Hunting and Intelligence
- Critical Thinking
- Attention to Detail
- Incident Reporting and Mitigation
- Adaptability
- Time Management
- Continuous Learning

PROJECTS

- Virtual Lab Setup

- Active Directory Setup

- Gaining-Camera-and-Microphone-Access

- Gaining_Shell_Access_By_Reverse_Shell

- Basic_Firewall_Using_Iptables

- SOAR-EDR

- Firewall pfSense Configuration

- Intrusion Detection System (IDS)_Configuration

- Intrusion Prevention System (IPS) Configuration

- Honeypot Installation, Configuration
  and Monitoring (Cowrie)

- Honeypot Installation, Configuration
  and Monitoring (OpenCanary)

- Splunk and Splunk Forwarder Installation
  and Configuration

- Nessus Installation And Vulnerability Scanning

- Ubuntu Server Installation

- Installation and Configuration of SplunkForwarder
  and Sysmon on Windows

- Pi-hole

EDUCATION

BBMMTTC, Sahubahiyar, Jharkhand

D. EL. Ed. (Diploma in Elementary Education
2021

Digikore Collage of Animation, Pune

B. Sc. in Media Graphica and Animation
2012

PROFESSIONAL EXPERIENCE

Quality Analyst

TCS Pune | January 2013 - July 2015

• Quality assurance of assigned Products and maintaining its standard prior to dispatching to the customer.
• 2nd level of quality check of Yellow Page (YP) (US) print advertisements that are designed by the Design Team.
• The quality check includes checking the layout and other design aspects, guidelines adherence, language accurateness.
• Reporting Issues (Defects)
• Validation and Remediation activity performed.
• Verification of details provided by customer against customer website.
• Limiting the flow of error.
• Professionally handling incoming request from customers and ensure that issues are resolved both promptly and thoroughly.

Quality Analyst

Wipro Technologies Pune | July 2015 - July 2016

• 2nd level of quality check of Yellow Page (YP) and White Page (WP) (UK) print and online advertisements.
• The quality check includes checking the layout and other design aspects, sensis brand guidelines adherence, language accurateness.
• Testing links on webpages. Validate if the link is broken and send it for fixing.
• Reporting Issues (Defects)
• Validation and Remediation activity performed.
• Verification of details provided by customer against customer website.
• Limiting the flow of error.
• Received knowledge of the process from the client, understood the process and then conducted end-to-end training for the Off-Shore team in India to successfully complete the transition of the process.

Amass Society to Rejuvenate and Activate (ASRA)

Member | 2017 - Present

• Conducting Surveys
• Teaching Students.
• Managing Events
• Conducting Awareness Programmes

Cybersecurity Intern

Texial | July 2024 - Present

• Monitored network traffic using Wireshark to detect and report suspicious activity, contributing to the early detection of potential security threats
• Assisted in vulnerability assessments using Nessus and Nmap, identifying 10+ critical vulnerabilities and asked for patching to secure company systems.
• Supported penetration testing exercises, helping to identify and mitigate network weaknesses.
• Researched emerging threats and proposed improvements.
